

PHOENIX GRASS SEED RANGE

Phoenix Amenity Supplies bring to you a complete range of quality grass seed mixtures for all situations.

Landscape mixtures for hard wearing areas, fine fescue mixtures for high quality fine turf landscaping and low maintenance mixtures for embankments and reduced maintenance landscaping are available. Specialist landscape mixtures are also included for use on road verges, shaded areas and coastal areas along with a mixture designed to increase fertility in poor soils and on reclamation sites.

The contractor covering sports field maintenance and construction is not forgotten, as a complete range of mixtures for sports turf areas covering summer and winter sports, bowls and a comprehensive range of rye and non rye golf course mixtures and fine greens mixtures are also available.

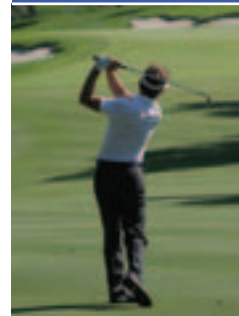

Special Mixtures

As well as the mixtures shown we are always pleased to advise upon and produce mixtures to your own specification (subject to a minimum order quantity of 40 kgs). Please enquire.

Traditional Greens Mix

This is the traditional 80/20 greens mixture which is designed to give a fine dense sward tolerant of close mowing, leaving a good playing surface and demonstrated on numerous greens throughout the country.

- 80% WILMA Chewings Fescue
- 20% HIGHLAND Brown Top Bent

Premier Greens Mix

A superb high quality greens mixture still centred on the traditional 80/20 mixture, but incorporating 40% Slender CRF and 10% Tenuis BTB. This provides a more compact and dense sward with excellent close mown characteristics leading to the high quality playing surface expected by today's amateurs and professionals alike.

- 40% MUSICA Chewings Fescue
- 40% REGGAE Slender Creeping Red Fescue
- 10% TROY Brown Top Bent "Tenuis"
- 10% HIGHLAND Brown Top Bent

Fine Ornamental Greens Mix

An excellent blend of fine fescues that should develop into a truly magnificent high quality ornamental lawn, that will give a fine dense sward that cuts well and looks attractive all year.

- 30% MUSICA Chewings Fescue
- 30% REGGAE Slender Creeping Red Fescue
- 30% HERALD Creeping Red Fescue
- 10% TROY Brown Top Bent "Tenuis"

All Bent Renovation Mix

Ultimately one of the best ways of renovating and rejuvenating golf greens is to overseed with an all Bent (Agrostis Tenuis) Mixture. This will help to maintain and improve the dense compact playing surface characteristics required for successful play on today's greens.

- 70% TROY Brown Top Bent "Tenuis"
- 30% EGMONT Brown Top Bent "Tenuis"

Premier Mix (Quality Landscape & Fairway Mix includes PRG)

An excellent choice for most general purpose situations where a quality fine-leaved but hard wearing turf is required. Quick to establish and tolerant of wear, this mixture cuts cleanly and offers year round durability with reduced maintenance costs.

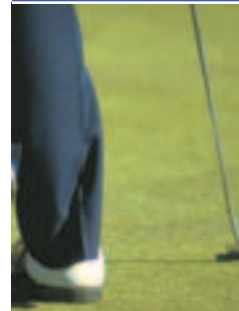

- 45% MARGARITA Perennial Rye Grass
- 10% MIRACLE Smooth Stalked Meadow Grass
- 15% REGGAE Slender Creeping Red Fescue
- 25% MUSICAL Chewings Fescue
- 5% HIGHLAND Brown Top Bent

Prize Mix (Quality Landscape & Fairway Mix non PRG)

This versatile mixture offers the best cultivars for fineness of leaf and tolerance to close mowing. The inclusion of Miracle SSMG gives this mixture an excellent, durable, fine-leaved appearance leaving a fine turf finish with low maintenance costs.

- 25% MUSICAL Chewings Fescue
- 20% REGGAE Slender Creeping Red Fescue
- 40% HERALD Creeping Red Fescue
- 10% MIRACLE Smooth Stalked Meadow Grass
- 5% HIGHLAND Brown Top Bent

Cricket Wicket Mix

This mixture offers a combination of two high quality fine leaved perennial rye grasses that makes this mixture an excellent choice for renovating cricket wickets and other summer sports areas before, during and after the season.

50% SAUVIGNON / MARGARITA Perennial Rye Grass
50% CONRAD Perennial Rye Grass

35 20 12

Summer Sports Mix

A versatile mixture containing both fine leaved perennial Rye grasses and fescues, that will not only perform well under close mown management, but will leave a dense and even surface which is a necessity where regular bounce is a pre-requisite such as tennis and cricket, and will perform well under wear.

25% CONRAD Perennial Rye Grass
35% MARGARITA Perennial Rye Grass
15% REGGAE Slender Creeping Red Fescue
20% MUSICAL Chewings Fescue
5% HIGHLAND Brown Top Bent

35 20 12

Premier Winter Sports Mix

This winter sports renovation mixture contains some of the best varieties available for use in renovating heavy duty sports fields. This mixture will not only establish quickly but will leave a dense hard wearing sward that will recover well after play.

25% HUGO/BIZET Perennial Rye Grass
40% VERDI Perennial Rye Grass
35% ESSENCE Perennial Rye Grass

35 20 25

(NB other mixtures for winter sports are available on request)

Low Maintenance Mix / Golf Roughs Mix

This mixture is suitable for areas that require the minimal amount of maintenance, and may be cut as little as twice a year and will develop into a low maintenance grass sward.

- 20% REGGAE Slender Creeping Red Fescue
- 30% HERALD Creeping Red Fescue
- 10% CONNI Smooth Stalked Meadow Grass
- 15% TRIANA Hard Fescue
- 20% WILMA Chewings Fescue
- 5% HIGHLAND Brown Top Bent

Universal Mix (Economy Landscape & Fairway Mix includes PRG)

A quick establishing economical mixture giving a compact hard wearing sward with good appearances. Tolerant to reasonable wear from both pets and children this mixture offers excellent value for money.

- 45% VERDI Perennial Rye Grass
- 35% HERALD Creeping Red Fescue
- 20% WILMA Chewing Fescue

Front Lawn Mix (Economy Landscape & Fairway Mix non PRG)

This mixture offers good value for fine lawns, providing an excellent appearance that tolerates limited wear, but offers year round colour, low maintenance costs, and provides a moderate tolerance to drought.

- 55% HERALD Creeping Red Fescue
- 40% WILMA Chewings Fescue
- 5% HIGHLAND Brown Top Bent

Back Lawn Mix

A quick to establish, economical, hard wearing lawn mixture suitable for back lawns, childrens play areas and general purpose landscaping where cost savings are important.

- 40% VERDI Perennial Rye Grass
- 60% HERALD Creeping red fescue

Woodland & Heavy Shade Mix

NEW FORMULA

Suitable for establishing a grass sward beneath mature trees in heavy woodland landscape areas or beside large buildings. This balanced blend of species suitable for cold, damp/dry nutrient hungry soils often found in these situations, will produce a green grass cover in these often difficult conditions. Infrequent mowing is the secret to a successful shade tolerant sward.

- 25% Dwarf Perennial Rye Grass
- 40% Strong Creeping Red Fescue
- 10% Rough Stalked Meadow Grass
- 10% Smooth Stalked Meadow Grass
- 10% Wood Meadow Grass
- 3% Yorkshire Fog
- 2% Creeping Bent

50 30 AS Req

Shade Area Mix

A mixture suitable for establishing grass in shady areas, either under trees or between buildings. The inclusion of a Dwarf PRG will give quick establishment and act as a nurse crop for the slower developing shade tolerant species. It is important to note that infrequent mowing is the secret to a successful shade tolerant sward.

- 25% VERDI Perennial Rye Grass
- 10% SAMANTA Slender Creeping Red Fescue
- 55% HERALD Creeping Red Fescue
- 5% DASAS Rough Stalked Meadow Grass
- 5% MIRACLE Smooth Stalked Meadow Grass

50 30 50

Embankment Mix

NEW FORMULA

An economical non Rye Grass mixture containing Rhizomatous grasses suitable for soil stabilization on steep banks and slopes, the mixture will be tolerant to dry conditions found on embankments.

- 75% HERALD Creeping Red Fescue
- 15% MIRACLE Smooth Stalked Meadow Grass
- 10% TRIANA Hard Fescue

50 30 25

Coastal Mix

NEW FORMULA

A mixture designed to help soil stabilisation and therefore reduce the risk of erosion on exposed coastal sites. A tolerance of salt laden winds and dry sandy conditions makes this an ideal mixture for coastal areas.

- 20% Amenity Perennial Rye Grass
- 40% Slender Red Fescue
- 15% Hard Fescue
- 12% Smooth Stalked Meadow Grass
- 8% Salt Marsh Grass
- 3% Creeping Bent Grass
- 2% Highland Brown Top Bent

35 20 20

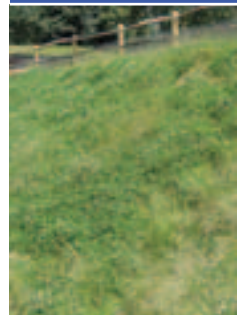

D.O.T. Verge Mix

The official Ministry of Transport Mixture for road verges, central reservations and bridge works. A quick to establish mixture that offers drought tolerance and soil stability on slopes and embankments, and offers limited tolerance of salt spray and exhaust fumes.

- 25% LIFRANCE Perennial Rye Grass
- 20% HERALD Creeping Red Fescue
- 30% TRIANA Hard Fescue
- 10% BALIN Smooth Stalked Meadow Grass
- 10% HIGHLAND Brown Top Bent
- 5% HUIA White Clover

25 10 AS Req

Legume Fertility Builder Mix

A blend of Legumes and Trefoils designed to act as a pioneer crop on areas of reclaimed land where low fertility is a concern. In time this mixture will provide a green manure crop that can be used to add structure to the soil.

- 20% White Clover
- 20% Red Clover
- 15% Alsike Clover
- 15% Lucerne
- 20% Sainfoin
- 10% Birds Foot Trefoil

Reclamation Mix

NEW FORMULA

A true low maintenance reclamation mixture suitable for land reclamation including quarry sites, open cast mine sites, spoil heaps, and general landfill sites. This well balanced blend of Fescues, Bents, and Nitrogen Fixing Legumes and Trefoils is ideally suited to dry infertile, almost drought conditions with a limited tolerance to metal contamination.

- 30% Slender Creeping Red Fescue
- 20% Chewings Fescue
- 15% Strong Creeping Red Fescue
- 10% Hard Fescue
- 10% Flattened Meadow Grass
- 7% Brown Top Bent
- 5% Birds Foot Trefoil
- 3% Wild White Clover

Reclamation Mix (Plus Rye Grass)

NEW FORMULA

A mixture suitable for most areas of land reclamation, including quarry sites, open cast mine sites, spoil heaps, and general landfill sites. The Perennial Rye Grass will quickly establish to act as a nurse crop for the remaining species which are selected for their excellent tolerance to infertile conditions and areas of environmental stress.

- 20% Late (diploid) Perennial Rye Grass
- 30% Slender Creeping Red Fescue
- 15% Strong Creeping Red Fescue
- 10% Hard Fescue
- 10% Flattened Meadow Grass
- 7% Brown Top Bent
- 5% Birds Foot Trefoil
- 3% Wild White Clover

BIRD STRIKE MIX

NEW FOR 2009

The safety of aircraft and the danger of damage caused by birds striking aircraft whilst taking off or landing has long been a concern for authorities responsible for aircraft safety. This has brought about the introduction of "Long Grass Management".

Tall Fescue, Cocksfoot & Timothy, in that order were found to be the best suited for a long grass policy. Tall Fescue is the most promising species due to its erect stiff growth habit. It is also a highly persistent, frost and drought tolerant species and is the most suited to long grass management when mown at an optimum height of 150 mm.

- 15% Late (tetraploid) Perennial Rye Grass
- 45% Tall Fescue
- 15% Cocksfoot
- 10% Timothy
- 10% Meadow Fescue
- 5% Crested Dogstail

10 20 150

Phoenix Pony Paddock Mix

This mixture provides a dense hard wearing sward giving many years of grazing. The Creeping Red Fescue content helps to minimise poaching damage. A simple long term grazing ley, suitable for a range of conditions and ideal for returning disturbed areas back to agricultural use after soil works. Will provide grazing for all classes of stock and is suitable for hay and silage production. Once sown it will offer a quality fodder for many years.

ALSO PLEASE NOTE: We do not include any tetraploid Rye Grass varieties in this mix because it can be detrimental to equine species digestive systems.

4.5 kg Early PRG (dip)
3.75 kg Late PRG (dip)
2.0 kg Late PRG (dip)
2.0 kg Strong Creeping Red Fescue
1.25 kg Timothy

13.5kg per acre

Phoenix "Supreme" Dual Purpose

A highly rated and productive long term (5 to 7 years) dual purpose ley mix that includes a quality white clover blend, perfect for a range of livestock situations. Also gives exceptional high sugar silage, plus high digestible aftermaths. This mix can also be supplied without the white clover content enabling efficient broadleaf weed control after establishment.

3.5 kg Intermediate PRG (dip)
1.0 kg Intermediate PRG (tet)
2.5 kg Intermediate PRG (tet)
3.0 kg Late PRG (dip)
3.0 kg Late PRG (tet)
0.25 kg Timothy
0.75 kg White Clover Blend

14.0kg per acre

Phoenix "Supreme" Permanent Pasture

An exceptional hardy and persistent ley mix suited to a minimum 8 to 10 year duration. Packed with top rated diploid perennials to provide a dense bottom to the sward, making this mix ideal for long term grazing with the flexibility to make hay, haylage and silage. Excellent for combined sheep and cattle enterprises.

2.0 kg Early PRG (dip)
3.5 kg Intermediate PRG (dip)
2.5 kg Late PRG (dip)
2.5 kg Late PRG (dip)
2.5 kg Late PRG (tet)
0.5 kg Timothy
0.5kg White Clover Blend

14.0kg per acre
