

PHOENIX TREE CARE PRODUCTS

Phoenix can offer a comprehensive range of tree and shrub protection and support products including tree guards and shelters, tree stakes, tree ties and belting from leading manufacturers including Tubex and Ruberloc. Fencing and netting products are also available.

TREE AND SHRUB PROTECTION

- **Spiral Tree Guards** - 38 mm diameter available in 3 sizes in both Brown and Clear colours

Supplied in boxes of 250

- **Spiral Tree Shelters** - Larger 50mm diameter transparent 60 cm high economical shelter

- **Defender Tree Shelters** - 10 cm diameter and available in 6 sizes green in colour

Supplied in boxes of 250

- **Fortetube Tree Shelter** - Available in 75 mm & 100 mm diameter and in 0.6m and 1.2 m high sizes. These shelters are ventilated to allow air movement in the shelter to help prevent fungal attack and heat stress. Lower section unventilated to prevent spray damage.

- **Tubex Tree and Shrub Shelters** - A complete and comprehensive range of tree and shrub shelters are available from this well known manufacturer. These shelters should improve survival rates by protecting the plant from rabbit predation.

- **Tree Mesh Rolls** - Plastic mesh guards are manufactured from chemical resistant polyethylene on 50 m rolls. 0.6 m available in black and 1.2 m available in green.

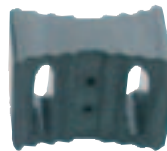

Other products are available please enquire for details.

TREE AND SHRUB SUPPORT

- **Tree Stakes** - Machine rounded, pointed and pressure treated stakes for use with whips or to support treeguards. Available in 50mm, 75mm and 100mm diameters and in sizes from 1.2m to 2.4m high.
- **Bamboo Canes** - Available in both lightweight and heavyweight, used to support whips and spiral rabbit guards.
- **Tree Shelter Stakes** - Treated softwood pointed stakes for use with tree shelters and plastic mesh guards. Available in square 75 cm, 90 cm, 1.2 m and 1.5 m lengths.
- **Buckle and Soft Tree Ties** - A comprehensive range of buckle tree ties and spacers and soft tree ties for supporting young trees to their supports.
- **Tree Belting** - Reinforced Rubberloc belting available in 14 mm, 24 mm, 35 mm and 50 mm wide belting on 10 m length rolls.
- **Spacer Sleeves and Rubber Blocks** - Both flat back and universal blocks and spacers for use with tree ties and rubber belting.
- **Plastic Mesh Tree Guard** -Young trees need protection in the early years of growth to ensure their survival against animals and mankind. In rural areas they are under attack from rabbit and deer that will feed on their shoots and strip and rub the bark from the stems and branches. Our plastic Mesh Guards are manufactured from chemical-resistant polyethylene which makes them extremely light, easy to carry and simple to erect and store. They are also very resilient and regain their shape after being knocked or pushed.

- **Continental Fine Mesh Guard -**

A new alternative to tube type shelters, the 'Continental' gives shelter without creating excessive heat or humidity levels around young trees. Used on the continent for several years, this system has been improved with vertical and conical strengtheners to enhance rigidity. Its soft top prevents any damage to emerging growth. Pre-formed, Continental Guards - 12 cm diam. Supported with two canes inside, or external stake (ties needed).

- **Tree Protector -** The tree protector comes in two diameter sizes 40 cm and 60 cm powder coated finished in black. All out tree protectors are supplied in two halves with corrosion resistant bolts supplied for joining them together before ground entry. Tree protectors are connected to grills by four locking bolts for stability and security.

- **Tree Grill -** The Grills are supplied in four pieces and are manufactured in a specially formulated SG Iron, making them effectively shatterproof, unlike most other cast iron products on the market. Available in three different sizes they are supplied as standard with a black painted finish.

- **Platipus Tree Anchoring Systems -** The Platipus™ rootball fixing system, including optional Plati-Mat™, remains the preferred method of securing rootballed and containerised semi-mature trees.

The ease of installation and lack of unsightly guy wires makes it the first choice of customers. Over the past two decades, Platipus™ have developed an extensive range of unique underground fixing solutions to suit most applications.

The Plati-Mat™ allows secure positioning of newly transplanted trees, whilst offering major benefits over traditional root support systems. Available in four standard sizes, the Plati-Mat™ can be tailored to suit most rootball dimensions. This significant development allows faster installation and provides a greater contact surface area at the top of the rootball or container grown tree.

The benefits of the system include:

- Planting at the nursery line.
- Reduced overall installation time.
- More secure fixing creating better establishment.
- No unsightly stakes or timber above ground.
- Suitable for most rootballed and containerised stock.

We are happy to discuss and recommend rootball fixing kits for particular applications and soil conditions.

GREENLEAF ROOT RAIN METRO

Root Rain Metro waterers are probably the most cost effective tree irrigators on the market. Simple but extremely effective, the Root Rain Metro range comes in sizes to suit all tree planting applications. (Pipe diameter is 35 mm).

GREENLEAF ROOT RAIN PRECINCT

Designed specifically for locations requiring a permanent irrigation/aeration solution, the Root Rain Precinct features a heavy cast aluminium inlet with a lift and swivel vented cap. Ideal for setting in paved surrounds, tree grills etc. the Root Rain Precinct incorporates an aluminium tee section and 60 mm distributor circuit for fast watering. Specification: 100 mm diameter cast inlet, circuit 60mm diameter.

GREENLEAF ROOT RAIN CIVIC

The Root Rain Civic, is a well proven large capacity watering system popular with contractors and architects who like its ease of installation and the ability to cope with fast watering. Using the same tee section as the Root Rain Precinct, the Root Rain Civic features aluminium, powder coated inlet with vented cap on a retainer chain. Specification: 80mm aluminium inlet, circuit 60mm diameter.

GREENLEAF ROOT RAIN URBAN

A large capacity irrigation system with a fixed non removable grid type inlet to allow water and air through but preventing ingress of litter and debris. The Root Rain Urban has been designed as a general purpose, large capacity watering system, particularly suited to parklands and roadside verge tree planting. The inlets are strimmer resistant and can be set below mowing machine height. The Root Rain Urban comprises a plastic tee section, perforated riser and push fit reducer inlet. The irrigation circuit is 60mm PE pipe in a choice of lengths to suit tree pit size. The inlet is moulded from polyethylene and forms a fixed, inset grid designed for ease of watering. When installed this is the only visible part on the surface. This system is easy to install and very cost effective for larger scale planting schemes.

RITE-EDGE

Rite-Edge - A Long Term, Corrosion Resistant Solution to Edging.

Easy installation and Saves Hours.

Designed by landscape architects and contractors who have experience of the exact requirements of edging products.

- Ideal for plant bed, lawns, pathways, jogging trails, driveways, maintenance strips and many more!
- Circles are easily formed.
- Special corner connectors allow neat tight angle corners.
- Stakes lock into position for strong permanent positioning.
- Unique telescopic design is simple, quick, strong and eliminates the need for connector pins and stakes which can open in time.
- Lifetime Maintenance Free.
- Manufactured in aluminium, which is strong, light and durable. Will not crack, rot or need re-painting.
- Structurally strong aluminium stakes to prevent frost heave, which will also not rust or cause corrosion in the edging.
- Sizes available: 3.2mm x 102mm x 2.44m x 14 pieces
- Colours available: Natural Aluminium, Bronze, Green or Black.

MISCELLANEOUS FENCING AND NETTING PRODUCTS

- **Welded Mesh Tree Guards** - 12 g gauge galvanised metal in a range of heights and diameters.
- **Cross Bars** - For use with two stake and flat block fixing systems
- **Willow Hurdles** - Panels are 6 ft wide and come in 3 ft, 4 ft, 5 ft and 6 ft high natural woven willow
- **Rabbit Netting** - Available in a wide range of roll sizes
- **Post Driver** - Double handed post driver suitable for tree stake and fence post erection
- **Tree Stake Nails** - Galvanised nails in a range of sizes for fixing cross bars and stakes
- **Heavy Duty Staple Gun & Staples** - Ideal for attaching plastic mesh guards to posts and stakes
- **Cable Ties** - Nylon cable ties for joining plastic mesh into tubes or to support mesh tubes
